CONTENTS OF VOLUME 87

NUMBER 1, 25 JULY 1974

THOMAS, J. O., Chemical Linkage of the Tail to the Right-hand End of Bacteriophage Lambda DNA 1

CHATTORAJ, D. K. and INMAN, R. B., Location of DNA Ends in P2, 186, P4 and Lambda Bacteriophage Heads 11

CUTFIELD, J. F., CUTFIELD, S. M., DODSON, E. J., DODSON, G. G. and SABESAN, M. N., Low Resolution Crystal Structure of Hagfish Insulin . . . 23

FLAMAND, A. and BISHOP, D. H. L., *In vivo* Synthesis of RNA by Vesicular Stomatitis Virus and its Mutants 31

KAMIYA, R. and ASAKURA, S., Formation of a Flagella-like but Straight Polymer of *Salmonella* Flagellin 55

CROTHERS, D. M., COLE, P. E., HILBERS, C. W. and SHULMAN, R. G., The Molecular Mechanism of Thermal Unfolding of *Escherichia coli* Formylmethionine Transfer RNA 63

DAVID, M. M. and DANIEL, E., Subunit Structure of Earthworm Erythrocruorin 89

Appendix: BEN-SHAUL, Y., Electron Microscopy of Earthworm Erythrocruorin 101

GANESAN, A. K., Persistence of Pyrimidine Dimers during Post-replication Repair in Ultraviolet Light-irradiated *Escherichia coli* K12 . . . 103

MISKIN, R. and ZAMIR, A., Enhancement of Peptidyl Transferase Activity by Antibiotics Acting on the 50 S Ribosomal Subunit. 121

LETTERS TO THE EDITOR

MISKIN, R. and ZAMIR, A., Inhibition of Interconversion of Ribosomes between Forms Active and Inactive in 30 S Subunit Functions by Aminoglycoside Antibiotics 135

HOUSTON, L. L., ODELL, J., LEE, Y. C. and HIMES, R. H., Solvent Isotope Effects on Microtubule Polymerization and Depolymerization . . 141

HENDRICKSON, W. A. and KLIPPENSTEIN, G. L., Crystals of Myohemerythrin 147

ANNOUNCEMENT 151

NUMBER 2, 5 AUGUST 1974

PARKER, D. L. and GLASER, D. A., Chromosomal Sites of DNA–Membrane Attachment in *Escherichia coli* 153

LOTZ, B., Crystal Structure of Polyglycine I 169

COLONNA-CESARI, F., PREMILAT, S. and LOTZ, B., Structure of Polyglycine I: A Comparison of the Antiparallel Pleated and Antiparallel Rippled Sheets 181

LOTZ, B., BRACK, A. and SPACH, G., β Structure of Periodic Copolypeptides of L-Alanine and Glycine. Their Relevance to the Structure of Silks . . 193

JORDAN, B. R., GALLING, G. and JOURDAN, R., Sequence and Conformation of 5 S RNA from *Chlorella* Cytoplasmic Ribosomes: Comparison with other 5 S RNA Molecules 205

MADEN, B. E. H. and ROBERTSON, J. S., Demonstration of the "5·8 S" Ribosomal Sequence in HeLa Cell Ribosomal Precursor RNA . . . 227

SPIERS, J. and BIRNSTIEL, M., Arrangement of the 5·8 S RNA Cistrons in the Genome of *Xenopus laevis* 237

GALLWITZ, U., KING, L. and PERHAM, R. N., Preparation of an Isomorphous Heavy-atom Derivative of Tobacco Mosaic Virus by Chemical Modification with 4-Sulpho-phenylisothiocyanate 257

MANDELKOW, E. and HOLMES, K. C., The Positions of the N-terminus and Residue 68 in Tobacco Mosaic Virus 265

FAREED, G. C., BYRNE, J. C. and MARTIN, M. A., Triplication of a Unique Genetic Segment in a Simian Virus 40-like Virus of Human Origin and Evolution of New Viral Genomes 275

KHOURY, G., FAREED, G. C., BERRY, K., MARTIN, M. A., LEE, T. N. H. and NATHANS, D., Characterization of a Rearrangement in Viral DNA: Mapping of the Circular Simian Virus 40-like DNA Containing a Triplication of a Specific One-third of the Viral Genome 289

BARTHELMESS, I. B., CURTIS, C. F. and KACSER, H., Control of the Flux to Arginine in *Neurospora crassa:* De-repression of the Last Three Enzymes of the Arginine Pathway. 303

YANAGIDA, M., Isolation by Affinity Chromatography of a Precursor Head Protein (P23) of Bacteriophage T_4 317

BUNTING, J. R. and CATHOU, R. E., Energy Transfer Distance Measurements in Immunoglobulins. III. Location of the Light–Heavy Interchain Disulfide Bond in Rabbit Immunoglobulin G Antibody 329

APPELS, R., BOLUND, L. and RINGERTZ, N. R., Biochemical Analysis of Reactivated Chick Erythrocyte Nuclei Isolated from Chick/HeLa Heterokaryons 339

TEICHBERG, V. I., SHARON, N., MOULT, J., SMILANSKY, A. and YONATH, A., Binding of Divalent Copper Ions to Aspartic Acid Residue 52 in Hen Egg-white Lysozyme 357

LETTER TO THE EDITOR

NAGATA, T. and HORIUCHI, T., An Amber *dna* Mutant of *Escherichia coli* K12 Affecting DNA Ligase 369

ANNOUNCEMENTS 375

NUMBER 3, 15 AUGUST 1974

GALIBERT, F., SEDAT, J. and ZIFF, E., Direct Determination of DNA Nucleotide Sequences: Structure of a Fragment of Bacteriophage ϕX174 DNA . 377

Announcement 863

Index to Volume 87

$\bar{A}$, transition from $\bar{B}$ of DNA in solution, 817
Adenovirus heteroduplex DNA molecules, specific fragmentation with single-strand specific nucleases of *Neurospora crassa*, 437
Agglutinin, wheat germ, non-crystallographic symmetry in the crystal dimer, 835
— — —, preliminary crystallographic study, 843
L-Alanine and glycine, β structure of periodic copolypeptides; relevance to the structure of silks, 193
Amidination of the outer and inner surfaces of the human erythrocyte membrane, 541
Amino acid sequence in membrane-penetrating segment of membrane proteins, 853
Aminoglycoside antibiotics inhibit interconversion of ribosomes between forms active and inactive in 30 S subunit functions, 135
Amplification of ribosomal RNA genes by rolling circles, 473
Antibiotics acting on 50 S ribosomal subunit enhance peptidyl transferase activity, 121
—, aminoglycoside, inhibit interconversion of ribosomes between forms active and inactive in 30 S subunit functions, 135
Antibody–hapten interactions: circular and linear polarization of the fluorescence of dansyl bound to anti-dansyl antibodies, 725
Antigenic determinants of nuclear and mitochondrial glutamate dehydrogenase, 859
APPELS, R., BOLUND, L. & RINGERTZ, N. R., Biochemical analysis of reactivated chick erythrocyte nuclei isolated from chick/HeLa heterokaryons, 339
Arginine in *Neurospora crassa*, control of flux: de-repression of the last three enzymes of the arginine pathway, 303
ASAKURA, S. (see also KAMIYA, R.), 55
Aspartic acid residue 52, binding of divalent copper ions in hen egg-white lysozyme, 357

β structure of periodic copolypeptides of L-alanine and glycine; their relevance to the structure of silks, 193
$\bar{B}$ to $\bar{A}$ transition of DNA in solution, 817
Bacteriophage lambda DNA, chemical linkage of the tail to the right-hand end, 1
— —, P2, 186 and P4 heads, location of DNA ends, 11
— — *trp*, specific relaxation of polarity in read-through transcription of the translocated *trp* operon, 741
— ϕX174 DNA, structure of a fragment by direct determination of DNA nucleotide sequences, 377
— T_4, isolation by affinity chromatography of a precursor head protein (P23), 317
BAKKEN, A. (see also ROCHAIX, J.-D.), 473
BARTHELMESS, I. B., CURTIS, C. F. & KACSER, H., Control of the flux to arginine in *Neurospora crassa:* de-repression of the last three enzymes of the arginine pathway, 303
BARTOK, K., GARON, C. F., BERRY, K. W., FRASER, M. J. & ROSE, J. A., Specific fragmentation of adenovirus heteroduplex DNA molecules with single-strand specific nucleases of *Neurospora crassa*, 437
Bence-Jones protein, lambda-type, structure of a dimeric fragment, 505
BEN-SHAUL, Y., Electron microscopy of earthworm erythrocruorin, 101 (*Appendix* to DAVID, M. M., 89)
BERG, H. C. (see also WHITELEY, N. M.), 541
BERRY, K. (see also KHOURY, G.), 289
— (see also BARTOK, K.), 437
Binding of divalent copper ions to aspartic acid residue 52 in hen egg-white lysozyme, 357
BIRD, A. (see also ROCHAIX, J.-D.), 473
BIRNSTIEL, M. (see also SPIERS, J.), 237
BISHOP, D. H. L. (see also FLAMAND, A.), 31
BOLUND, L. (see also APPELS, R.), 339
Bovine pancreatic trypsin inhibitor, reduced, renaturation, 563
BRACK, A. (see also LOTZ, B.), 193

Brufani, M., Cerrini, S., Fedeli, W. & Vaciago, A., Rifamycins: an insight into biological activity based on structural investigations, 409
Bunting, J. R. & Cathou, R. E., Energy transfer distance measurements in immunoglobulins. III. Location of the light-heavy interchain disulfide bond in rabbit immunoglobulin G antibody, 329
Burger, M. M. (see also Wright, C. S.), 843
Byrne, J. C. (see also Fareed, G. C.), 275

Casola, L., Ruffilli, A. & Di Prisco, G., Nuclear glutamate dehydrogenase: unique antigenic determinants and determinants common to the mitochondrial enzyme, 859
Cathou, R. E. (see also Bunting, J. R.), 329

Chattoraj, D. K., & Inman, R. B., Location of DNA ends in P2, 186, P4 and lambda bacteriophage heads, 11
Chick/HeLa heterokaryons, biochemical analysis of reactivated chick erythrocyte nuclei, 339
Chlorella cytoplasmic ribosomes, sequence and conformation of 5 S RNA and comparison with other 5 S RNA molecules, 205
Chromatography, affinity, use in isolation of a precursor head protein (P23) of bacteriophage T_4, 317
Chromosomal sites of DNA–membrane attachment in *Escherichia coli*, 153
Cistrons, 5·8 S RNA, arrangement in the genome of *Xenopus laevis*, 237
Cole, P. E. (see also Crothers, D. M.), 63
Colonna-Cesari, F., Premilat, S. & Lotz, B., Structure of polyglycine I: a comparison of the antiparallel pleated and antiparallel rippled sheets, 181
Conformation and sequence of 5 S RNA from *Chlorella* cytoplasmic ribosomes: comparison with other 5 S RNA molecules, 205
Copolypeptides, periodic, of L-alanine and glycine, β structure; relevance to the structure of silks, 193
Copper ions, divalent, binding to aspartic acid residue 52 in hen egg-white lysozyme, 357
Core enzyme from *Escherichia coli*, maturation *in vitro*, 523
Creighton, T. E., Intermediates in the refolding of reduced pancreatic trypsin inhibitor, 579
—, Renaturation of the reduced bovine pancreatic trypsin inhibitor, 563
—, The single-disulphide intermediates in the refolding of reduced pancreatic trypsin inhibitor, 603
Crosslinking of 30 S protein S16 to 50 S proteins by glutaraldehyde or formaldehyde, 509
Crothers, D. M., Cole, P. E., Hilbers, C. W. & Shulman, R. G., The molecular mechanism of thermal unfolding of *Escherichia coli* formylmethionine transfer RNA, 63
Crystal dimer of wheat germ agglutinin, non-crystallographic symmetry, 835
— structure, low resolution, of hagfish insulin, 23
— — of polyglycine I, 169
— — — — —; comparison of the antiparallel pleated and antiparallel rippled sheets, 181
Crystallographic study, preliminary, of wheat germ agglutinin, 843
Crystals of myohemerythrin, 147
Curtis, C. F. (see also Barthelmess, I. B.), 303

Cutfield, S. M. (see also Cutfield, J. F.), 23
Cyclization of *Xenopus laevis* 5 S DNA, 463
Cytoplasmic ribosomes of *Chlorella*, sequence and conformation of 5 S RNA and comparison with other 5 S RNA molecules, 205

Daniel, E. (see also David, M. M.), 89
Dansyl bound to anti-dansyl antibodies, circular and linear polarization of fluorescence, 725
David, M. M. & Daniel, E., Subunit structure of earthworm erythrocruorin, 89
Davie, E. W. (see also Martelo, O. J.), 685
dna amber mutant of *Escherichia coli* K12 affecting DNA ligase, 369

Deoxyribonucleic acid, bacteriophage ϕX174, structure of a fragment by direct determination of nucleotide sequences, 377
— — end location in P2, 186, P4 and lambda bacteriophage heads, 11
— — heteroduplex molecules of adenovirus, specific fragmentation with single-strand specific nucleases of *Neurospora crassa*, 437
— — in bacteriophage lambda, chemical linkage of the tail to the right-hand end, 1
— — in solution, the $\bar{B}$ to $\bar{A}$ transition, 817
— — ligase affected by amber *dna* mutant of *Escherichia coli* K12, 369
— — –membrane attachment, chromosomal sites in *Escherichia coli*, 153
— —, 5 S, of *Xenopus laevis*, cyclization, 463
— —, viral, characterization of a rearrangement: mapping of the circular Simian virus 40-like DNA containing a triplication of a specific one-third of the viral genome, 289
— acids, twisted, interactions with enzymes; effects of superhelical turns, 797
De-repression of the last three enzymes of the arginine pathway in *Neurospora crassa*, 303
Di Prisco, G. (see also Casola, L.), 859
Dimer of wheat germ agglutinin crystals, non-crystallographic symmetry, 835
Dimeric fragment related to the lambda-type Bence-Jones protein, preliminary study of structure, 505
Dimers, pyrimidine, persistence during post-replication repair in ultraviolet light-irradiated *Escherichia coli* K12, 103
Disulfide bond, light–heavy interchain, in rabbit immunoglobulin G antibody, location by energy transfer distance measurements, 329
Dodson, E. J. (see also Cutfield, J. F.), 23
Dodson, G. G. (see also Cutfield, J. F.), 23
Dougan, A. H. & Glaser, D. A., Rate of chain elongation of ribosomal RNA molecules in *Escherichia coli*, 775

Earthworm erythrocruorin subunit structure, 89
Electron irradiation, influence on the stain distribution in electron microscopy of the stacked disk aggregate of tobacco mosaic virus protein, 657
— microscopy of earthworm erythrocruorin, 101
— — — the stacked disk aggregate of tobacco mosaic virus protein, 641, 657
Energy transfer distance measurements locate the light–heavy interchain disulfide bond in rabbit immunoglobulin G antibody, 329
Enzyme, dissociated, subunits, formation by chemical treatment during renaturation, 847
— interaction with twisted DNAs; effects of superhelical turns, 797
Erythrocruorin of earthworm, subunit structure, 89
Erythrocyte, chick, reactivated nuclei isolated from chick/HeLa heterokaryons, biochemical analysis, 339
— membrane, human, amidination of the outer and inner surfaces, 541
Erythroleukemic cells, cultured, globin gene expression, 697
Escherichia coli, a new class of promoter mutations in the lactose operon, 715
— —, chromosomal sites of DNA-membrane attachment, 153
— — core enzyme, maturation *in vitro*, 523
— — formylmethionine tRNA, molecular mechanism of thermal unfolding, 63
— — K12, amber *dna* mutant affecting DNA ligase, 369
— — —, ultraviolet light-irradiated, persistence of pyrimidine dimers during post-replication repair, 103
— —, protein–protein proximity in the association of ribosomal subunits: crosslinking of 30 S protein S16 to 50 S proteins by glutaraldehyde or formaldehyde, 509
— — RNA polymerase phosphorylation by rabbit skeletal muscle protein kinase, 685
— — 5 S RNA secondary structure, investigation by high-resolution NMR, 755
Evolution of new viral genomes; triplication of a unique genetic segment in a Simian virus 40-like virus of human origin, 275

Fareed, G. C., Byrne, J. C. & Martin, M. A., Triplication of a unique genetic segment in a Simian virus 40-like virus of human origin and evolution of new viral genomes, 275
